

British Values - Maths

Respect civil and criminal law

In mathematics, students are taught to think morally and to distinguish between right and wrong in the classroom in the maths lessons with regards to behaviour.

The maths department follow the school behaviour policy using rewards and sanctions when appropriate. The staff give clear reasons why they are being given out.

Acceptance and engagement with fundamental British values of democracy

We actively promote democracy through:

- Group presentations in maths with a democratic voting system
- Developing an understanding of consensus - e.g. it is by consensus that 0.5 rounds to 1.

Contribute positively to life in Modern Britain

Students actively contribute positively through:

- Entering national competitions such as the UKMT group maths challenge
- Seeing the application of maths in the wider world e.g. Mortgage costs when buying a house, depreciation of a car

Tolerance of those with different viewpoints

- During class discussions, staff insist that students listen to other student's point of view.
- Celebrating mathematicians who have contributed to Mathematical development worldwide - Pythagoras, Euler Gauss and others.
